Kata Aluan Pengarah Institut Sel Fuel

Assalamualaikum wbt dan salam sejahtera

Bengkel Penulisan Manuskrip dan Jurnal ini merupakan langkah Institut yang berkala untuk memberi panduan kepada semua ahli Institut supaya boleh menghasilkan makalah yang bermutu. Makalah yang dihasilkan, baik dari segi kuantiti maupun kualiti, merupakan salah satu penunjuk prestasi utama Institut.

Makalah-makalah yang telah dihimpun di dalam prasidang ini hendaknya dapat diteruskan sehingga berjaya diterbitkan dalam pelbagai jurnal antarabangsa yang diindeks oleh SCOPUS dan yang mempunyai faktor impak. Usaha yang berterusan perlu dibuat untuk memastikan tahap penyelidikan di Institut bertaraf dunia.

Pada kesempatan ini saya ingin mengucapkan setinggi-tinggi penghargaan dan terima kasih kepada urusetia bengkel yang telah berusaha untuk menjayakan program yang telah dirancang. Terima kasih juga saya ucapkan kepada semua penceramah yang telah sudi hadir dan mendedahkan asas-asas penulisan saintifik kepada semua ahli Institut. Sumbangan kakitangan sokongan untuk menjayakan bengkel ini juga sangat saya hargai.

Akhir kata, saya sangat berharap semoga bengkel ini menjadi pendorong bagi semua pensyarah, penyelidik dan pelajar siswazah untuk berlumba-lumba menghasilkan makalah yang lebih baik pada masa yang akan datang.

Sekian, Wassalam.

Prof. Ir.Dr.Hj Wan Ramli Wan Daud

KANDUNGAN

BAHAGIAN 1: ABSTRAK MAKALAH PASCASIDANG

KUMPULAN KEJURUTERAAN SISTEM PROSES SEL FUEL

- 1. Membrane reactor for hydrogen modelling** **1**
T. Husaini, Wan Ramli Wan Daud, A. Wahab Mohammad, Zahira Yaakob
- 2. Review: Modelling of water and thermal management for PEM fuel cell system** **2**
Erni Misran, Mulyazmi, Wan Ramli Wan Daud, Edy Herianto Majlan

KUMPULAN BAHAN DAN PEMBUATAN PLAT SEL FUEL

- 1. Influence of CNTs addition on electrical and hardness properties of the CNTs/epoxy nanocomposites** **3**
Hendra Suherman, Abu Bakar Sulung, Jaafar Sahari
- 2. The effects of deformation by compression on carbon black as a second filler of composite graphite-PP** **4**
Mohd Zulkefli Selamat, Jaafar Sahari, Norhamidi Muhamad, Andanastuti Mukhtar
- 3. Dispersed study on electrically conducting composite material** **5**
Yovial Mahyoedin, Jaafar Sahari, Andanastuti Mukhtar, Norhamidi Muhamad
- 4. Review of effect of polymer binder properties to the shrinkage and warpage manufacturing bipolar plate using injection molding process** **6**
Iswandi, Jaafar Sahari, Abu Bakar Sulung

KUMPULAN ELEKTROKIMIA SEL FUEL

- 1. Pressure effect on temperature optimization for membrane electrode assembly** **7**
Loh Kee Shyuan, Navriani Harahap, Abu Bakar Mohamad, Abdul Amir Hassan Kadhum, Wan Ramli Wan Daud
- 2. Fabrication gas diffusion electrode (GDE) using metal oxide as catalyst** **8**
Zaihasrah Masron, Abu Bakar Mohamad, Abdul Amir Hassan Khadum, Wan Ramli Wan Daud
- 3. Performance study of membrane electrode assembly in view of platinum loading on activated carbon support electrocatalyst** **9**
A. B. Mohamad, A. A. H. Kadhum, W. R. W. Daud, M. H. AbuBakar, S. E. Iyuke, N. Bahaman

- 4. Synthesis of composite membrane for PEMFC application at high temperature and low relative humidity** **10**
Siti Rahmah Mokhtaruddin, Abu Bakar Mohamad, Abdul Amir H. Kadhum, Mahreni Akhmad, Wan Ramli Wan Daud

- 5. Effect of the particles size to the electrochemical properties of Nafion-SiO₂-PWA nanocomposite membranes as electrolyte of proton exchange membrane fuel cell (PEMFC)** **11**
Mahreni, A.B. Mohamad, A.A.H. Kadhum, W. R. W Daud

KUMPULAN PEMROSESAN FUEL

- 1. A review of catalytic process for hydrogen production from glycerol by steam reforming (SR)** **12**
L. Hakim, Z. Yaakob, M. Ismail, W. R. W. Daud

- 2. Comparison between electroless plating and sol-gel method for palladium thin film coating on ceramic membrane : a review** **13**
R. Sari, Z. Yaakob, M. Ismail, W. R. W Daud

- 3. Review: Solid state hydrogen storage** **14**
K. L. Lim, Z. Yaakob, W. R. W. Daud

- 4 Manufacturing of a homogeneous polymer–zeolite nano-composite membranes for gas separation** **15**
H. Karkhanechi, H. Nazokdast, H. Kazemian, S. M. Bidoki

KUMPULAN HIDROGEN SURIA

- 1. Hydrogen production from photoelectrochemical water splitting** **16**
Asma M. Husin Milad, Wan Ramli Wan Daud

- 2. Dyes for sensitizer in photoelectrochemical water splitting: A review** **17**
Khuzaimah Arifin, Wan Ramli Wan Daud, Mohammad B. Kassim

- 3. Tris(dithiolene) tungstate as dye sensitizers for photocatalytic applications** **18**
Khuzaimah Arifin, Lorna Jeffrey Minggu, Rusli Daik, Wan Ramli Wan Daud and Mohammad B. Kassim

- 4. Tinjauan pembelahan air fotoelektrokimia untuk penghasilan hidrogen** **19**
Lorna Jeffery Minggu, Wan Ramli Wan Daud, Mohammad Kassim

KUMPULAN MIKRO SEL FUEL LANGSUNG

- 1. Performance of passive single stack 25 cm² active area polymethylmethacrylate (PMMA) based DMFC** **20**
Achmad Fauzie, Siti Kartom Kamarudin, Wan Ramli Wan Daud, Edy Herianto Majlan

2. Pembangunan model tidak mantap bagi sistem sel fuel metanol langsung (SFML) pasif (<i>Unsteady state modeling on passive liquid feed direct methanol fuel cell (DMFC)</i>)	21
Sahriah Basri, Siti Kamarudin Kamarudin, Wan Ramli Wan Daud, Zahira Yaakob, Mismisuraya Meor Ahmad	
3. Penghasilan kuasa yang tinggi oleh sistem pasif MDMFC dengan penggunaan muatan mangkin yang rendah untuk penjanaan peralatan berkuasa kecil	22
M. M. Ahmad, S. K. Kamarudin, W. R. W. Daud, Z. Yaakub	
4. Overview of the mechanistic modeling approach for direct methanol fuel cell	23
U. A. Hasran, S. K. Kamarudin, W. R. W. Daud, A. B. Mohamad, A. A. H. Kadhum, B. Y. Majlis	
5. Rekabentuk, fabrikasi dan pengujian stek multi-sel dan sel tunggal sel fuel pasif mikro metanol langsung dengan binaan asas PMMA	24
N. Hashim, S. K. Kamarudin, W. R. W. Daud, Zahira Yaakub	
6. Review paper of hybrid membrane for DMFC application	25
Haslina Ahmad, S. K. Kamarudin, U. A. Hasran, W. R. W. Daud	
KUMPULAN SEL FUEL OKSIDA PEPEJAL	
1. Dual phase composite electrolytes for intermediate & low temperature solid oxide fuel cell	26
Jarot Raharjo, Nanda Sastaviana, Dedikarni Panuh, A. Muchtar, N. Muhamad, E. H. Majlan and W. R. W. Daud	
2. A review of material development in intermediate temperature solid oxide fuel cells (IT-SOFCS)	27
N. Sastaviana, A. Muchtar, W. R. W. Daud, N. Muhamad, E. H. Majlan	
KUMPULAN BIO HIDROGEN	
1. Effect of initial pH and substrate concentration on hydrogen production by POME as substrate	28
Marzieh Badiei, Jamaliah Md Jahim, Nurina Anuar, Siti Rozaimah	
KUMPULAN BIOSEL FUEL	
1. Prototype of microbial fuel cell hybrid system for local industrial wastewater treatment	29
Lim Swee Su, Wan Ramli Wan Daud, Jamaliah Md. Jahim, Manal Ismail, Siti Kartom Kamarudin, Siti Norhana Shari	
2. Overview on microbial fuel cell	30
Siti Norhana Shari, Jamaliah Md. Jahim, Siti Kartom Kamarudin, Wan Ramli Wan Daud	

BAHAGIAN 2:
BAHAN CERAMAH

- 1. A strategy for writing up the research manuscript: contents, style, structure and organizing of the manuscript**
Prof. Dr. Lee Yook Heng
- 2. Writing scientific and engineering dissertations and journal papers**
Prof. Wan Ramli Wan Daud
- 3. Critical thinking and use of words**
Prof. Dr. Chan Swee Heng

MEMBRANE REACTOR FOR HYDROGEN MODELING

T. Husaini, Wan Ramli Wan Daud, A. Wahab Mohammad and Zahira Yaakob

Fuel Cell Institute,
Universiti Kebangsaan Malaysia, 43600 Bangi, Selangor.Malaysia.

Abstract

Estimated peak for the world energy production will occur between 2005 and 2015 (source, International Energy Agency (IEA) and United States Geological Survey (USGS)), seek alternative energy source are become important research. Fuel cell are quickly growing in popularity because they are use hydrogen as fuel and hydrogen is renewable. This research provides the designing, and optimizing membrane reactor in producing hydrogen that is suitable to fulfil the fuel specifications of the PEM-Fuel Cell Unit. Membrane reactor offers the possibility of overcoming the thermodynamic limitation of the reversible chemical reaction. If one of the reaction products removed from the reaction system, equilibrium-limited reaction's can achieve higher conversions at lower temperature. In this conditions combined of reaction and separation together at the same side can be considered as a means to improve energy used efficiency. The appropriate reactor design managed to improve yield or reaction selectivity, and reduce downstream separation costs. The operating temperature for reforming is 150°C to 280° has been designed for optimum condition, corresponding with the experimental result. Pd-Ag membrane is suitable for hydrogen purification which can be applied to fuel-cell system but the cost is high. Combined organic and inorganic membrane designs can reduce cost and time needed for fabricating gas separation membrane, improving and facilitating yield and selectivity.

Keywords: Membrane reactor modelling, hydrogen production

REVIEW: MODELLING OF WATER AND THERMAL MANAGEMENT FOR PEM FUEL CELL SYSTEM

Erni Misran^{a,b}, Mulyazmi^{a,c}, Wan Ramli Wan Daud^{a,*}, Edy Herianto Majlan^a

Abstract

This paper presents a models literature overview with emphasizing on water and thermal management of proton exchange membrane fuel cell (PEMFC) system. The models are classified into two big classes based on boundary of the system itself. The first class is concerning on mass and heat transfer in PEMFC components, involve membrane electrode assembly (MEA), single cell, and stack. The second class is concerning on mass and heat transfer in integrated system, i.e. PEM stack and auxiliary equipments (compressor, humidifier, cooler, etc.). The challenge of the model development in the future is also discussed.

Keywords: Model, water management, thermal management, PEMFC components, integrated system
